

Sea Grant

Coastal Science Serving Texans. The Texas Sea Grant College Program Strategic Plan 2002-2005. Dr. Robert Stickney. TAMU-SG-02-601.

This eight-panel brochure provides the goals upon which the Texas Sea Grant College Program will focus during the next four years. This is a revision of an earlier strategic planning document (Charting Our Course, TAMU-SG-99-601). The current plan incorporates elements of those developed by Texas A&M University and its College of Geosciences as well as plans from NOAA and the National Sea Grant Office and conclusion from a Texas Legislature interim study on the coastal area.

Implementation of the goals outlined in this brochure will involve a series of steps relative to each item listed under the research goal and programmatic goal. That implementation plan, including performance metrics, is being produced separately.

Implementing Coastal Science Serving Texans. The Texas Sea Grant College Program Implementation Plan 2002-2005. Dr. Robert Stickney. July 2002. TAMU-SG-02-603.

The Texas Sea Grant College Program strategic plan for 2002-2005, Coastal Science Serving Texans contains two primary goals related to research activities and programmatic aspirations. Both the research and the programmatic goals contain four broad subgoals and various numbers of approaches to address each subgoal. The strategic plan lays out, in broad terms, our vision for the program.

Texas Sea Grant College Program. 2001-2002. March 2001. TAMU-SG-01-601.

This 44-page booklet highlights the activities of the Texas Sea Grant College Program. It includes information on projects funded for 2001-2002, results of the 1998-2001 funding cycle. Contact information, including telephone numbers and FAX numbers and e-mail addresses, is included for all Sea Grant staff and research investigators.

Sea Grant Answers Your Questions. Dr. Robert Stickney. TAMU-SG-00-602.

Twelve of the questions most frequently asked of the Sea Grant staff are compiled and answered in this six-panel brochure. The questions range from what the national program represents to funding particulars to research priorities.

Measuring Our Progress. Texas Sea Grant College Program Annual Report Fiscal 1995-1997. 1998. 44 pages. TAMU-SG-98-602.

This booklet covers the period September 1, 1995 through February 28, 1997. It contains a summary of each of the research projects conducted during those funding cycles as well as summaries of activities associated with the Sea Grant Administration, Marine Advisory Service and Marine Information Service.

Creating the College of the Sea: The Origin of the Sea Grant Program. John Miloy. TAMU-SG-83-604. \$2.

Based on John Miloy's master's thesis written in 1976 at Texas A&M University, this book first discusses the "rediscovery" of the oceans and the increasing interest in oceanography after World War II. Governmental figures proposed many solutions to the problem of coordination of federal oceanographic research. Creating the College of the Sea describes how one such solution, the Sea Grant College Program, came about. It is based on a review of personal papers and correspondence, particularly those of Dr. Athelstan Spilhaus, and recounts meetings, discussions and congressional debates that led to passage of the Sea Grant Act of 1966. It includes that original legislation, the Sea Grant Program Improvement Act of 1976, and amendments passes in 1978 and 1980.
